SUMMARY

Full-stack Web Developer with a strong focus on UI/UX design, database management, and building scalable, responsive web applications. Experienced in the MVC architectural pattern using Laravel and ASP.NET Core with Razor. Skilled in both frontend and backend development, with a passion for turning complex ideas into clean, functional solutions. Open to remote work opportunities.

SKILLS

TECHNICAL

Laravel, ASP.NET Core, JavaScript, Vue.js, Bootstrap, Tailwind CSS, MySQL, MSSQL, MVC, API Integration, Git, GitHub

SOFT

Problem-solving, Critical Thinking, Adaptability, Teamwork, Time Management, Communication

PROJECTS

Jurnee – A productivity journaling app with smart tools for note-taking, research, and personal organization.

BookVault – A lightweight digital library system that lets users explore books, save them to their collection, and track reading progress—no setup required.

LearnConnect – A community platform for knowledge sharing and collaboration, featuring Q&A with voting, contributor stats, and a news feed powered by the Google API.

Diana's Resort – A responsive hotel booking platform with real-time availability, simple management, and secure confirmations.

Resume Builder – A simple resume creation tool designed to help users build polished CVs fast—no design skills needed.

OJT Time Logger – A digital logbook for interns that tracks daily time-in/out, calculates total hours, and generates attendance reports. Supervisors can validate logs, ensuring transparency and compliance.

Inventory Management System – A simple inventory system with stock monitoring, supplier tracking, and basic reports. Features a borrow request and approval workflow for managing items across locations.

Printing Service Request System – A print service request app where users upload documents and receive pickup notifications. Admins manage tasks, track workloads, and send email updates to streamline turnaround and communication.

INTERNSHIPS

Philippine Center for Postharvest Development and Mechanization

System Development

Developed a Facility Reservation System to streamline scheduling.

Jan 20, 2025 – Feb 13, 2025

ERN

Redesigned and modernized the RAFMES dashboard, enhancing its design, usability, and responsiveness.

Feb 14, 2025 – Mar 5, 2025

Network & Maintenance

Managed hardware and network maintenance, including printer repairs, troubleshooting, and PC setup.

Mar 11, 2025 – Apr 4, 2025

EDUCATION

College

College for Research and Technology
Bachelor of Science in Information Technology
Cabanatuan City, Nueva Ecija

2021- 2025
